## **Google Classroom: Grade Export Pilot FAQ**

### **Skyward SMS 2.0 Student Information System (SIS)**

**Q: What are the requirements to participate in this pilot?**

A: To participate in this pilot, please ensure the following:

- A G Suite Administrator has completed the [Application](#) form and signed the [PAPA](#).
- Instructors will need to have added grades into Classroom using the Gradebook.

**Q: Which Skyward Student Information System is compatible with this feature?**

A: Skyward SMS users will need to have purchased the Skyward LMS/OneRoster API license and use Skyward SMS 2.0 on a cloud-based instance (on-prem customers are able to use this feature, but troubleshooting support is not supported for on-prem customers during this integration).

- To check if you have this license, admins can do the following;
  - Once logged into Skyward SMS 2.0, navigate into Product Setup.
  - Follow the path Skyward Contact Access>Security>License Assignment.
  - Here you will want to look for license 578 – LMS/OneRoster API.
    - This will mean the license is owned and assigned for district use.
- For a district that does not own but would like to inquire on the license, they will want to contact their district's Sales Rep for additional details.

**Q: Are there any known requirements to be aware of when exporting grades to Skyward SMS 2.0?**

- Exporting existing Classroom classes to classes in the SIS relies on the email address field for students. Valid G Suite email addresses are needed to successfully export grades, and they must match the email addresses in the SIS.
- Co-teachers from outside your G Suite domain will not be able to export grades from your class.
- All assignments must have a due date. Due dates are required to push Classwork assignments and grades to Skyward SMS 2.0 SIS.

**Q: If I have more questions, where can I go to learn more?**

A: Please first review the pilot [FAQ](#) and visit the online [Help Center](#). If you still have questions, please email us at [grade-sync-pilot@google.com](mailto:grade-sync-pilot@google.com).
